**Subject:** Wilcox Refinery Geophysical Approach and Budgetary estimate

Tom,

Attached is the Geophysical Approach, a figure showing proposed traverses and two cost estimates. The first is for the geophysical survey with all ODC's, eight field staff and their travel and expenses. The second is for an additional four people to add two additional field crews to staff the EM Equipment. With time growing short, I've drafted the QAPP and have sent it over to Beth to review and edit, after which I'll have Donna finish it up so it's ready once the Work Assignment arrives. Have a look and let me know if I can be of further service on this.

Have a great day!
